Object: Proposed Milestone “Dadda’s Multiplier”

In my position of Chair of the IEEE Italy Section, and on behalf of the IEEE Italy Section Ex-Co, I hereby confirm that our Section strongly support the IEEE Milestone application “Dadda’s Multiplier”, which – if approved by the IEEE – will be placed in the Department of Electronics, Information and Bioengineering of Politecnico di Milano (in the location specified in the proposal).

We will be very glad and proud if this milestone will be approved since it will recognize the worldwide relevance and impact of the ideas and technological innovation developed by Luigi Dadda, one of the pioneers in digital circuits for computer arithmetics.

All expenses for the installation and the maintenance of the plaque will be paid by the IEEE Italy Section. Installation and maintenance will be performed by following the directions provided by the Department mentioned above.

Sincerely Yours,

Ermanno Cardelli
IEEE Italy Section, Chair
