

The Institute of Television Engineers Technical Progress Award Development Award 1989.

Development of a VHS movie with an anti-shake mechanism

Matsushita Electric Industrial Co., Ltd., Matsushita Kotobuki Electronics Co., Ltd.,
Matsushita Electronic Components Co., Ltd. Anti-Shake Technology Development Group

Based on a brilliant idea, they devised a lightweight and inexpensive method to detect the amount of shake in the vertical and horizontal directions of the camera and mechanically control the lens barrel skillfully, developing a consumer video camcorder that can significantly reduce image degradation caused by camera shake. It is expected that this development will contribute to the advancement and development of high-quality consumer video equipment in the future.
