

# Why 32 Hospitals In The Last 18 Months Made TDS Their Vendor Of Choice.

Consider the fundamental differences that make TDS\* hospital information systems (HIS) unique.

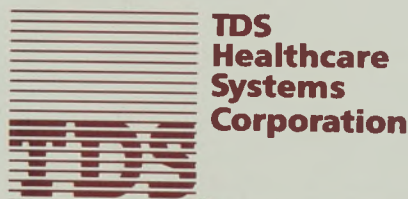

**Unmatched System Acceptance By Physicians And Nurses.** Realizing cost benefits and quality improvements from an HIS depends on direct professional use of the system. More than 100,000 physicians and nurses routinely use our systems every day.

**TDS Has Never Lost An Installed Patient Care System.** And that's after nearly two decades and more than 100 installations.

**Documented Cost Savings.** Hospitals have realized *net* savings of as much as \$1,000,000 per year.

**Flexible Integration With Existing Systems.** We've protected our customers' investments and given them full flexibility for the future by integrating with more departmental systems than any other HIS vendor in the world. Standard tools and protocols developed by TDS make it easy.

That's why those 32 hospitals selected us. Because when it comes down to the facts, there really is only one logical choice for a hospital information system. TDS.

The Vendor Of Choice For Hospital Information Systems.

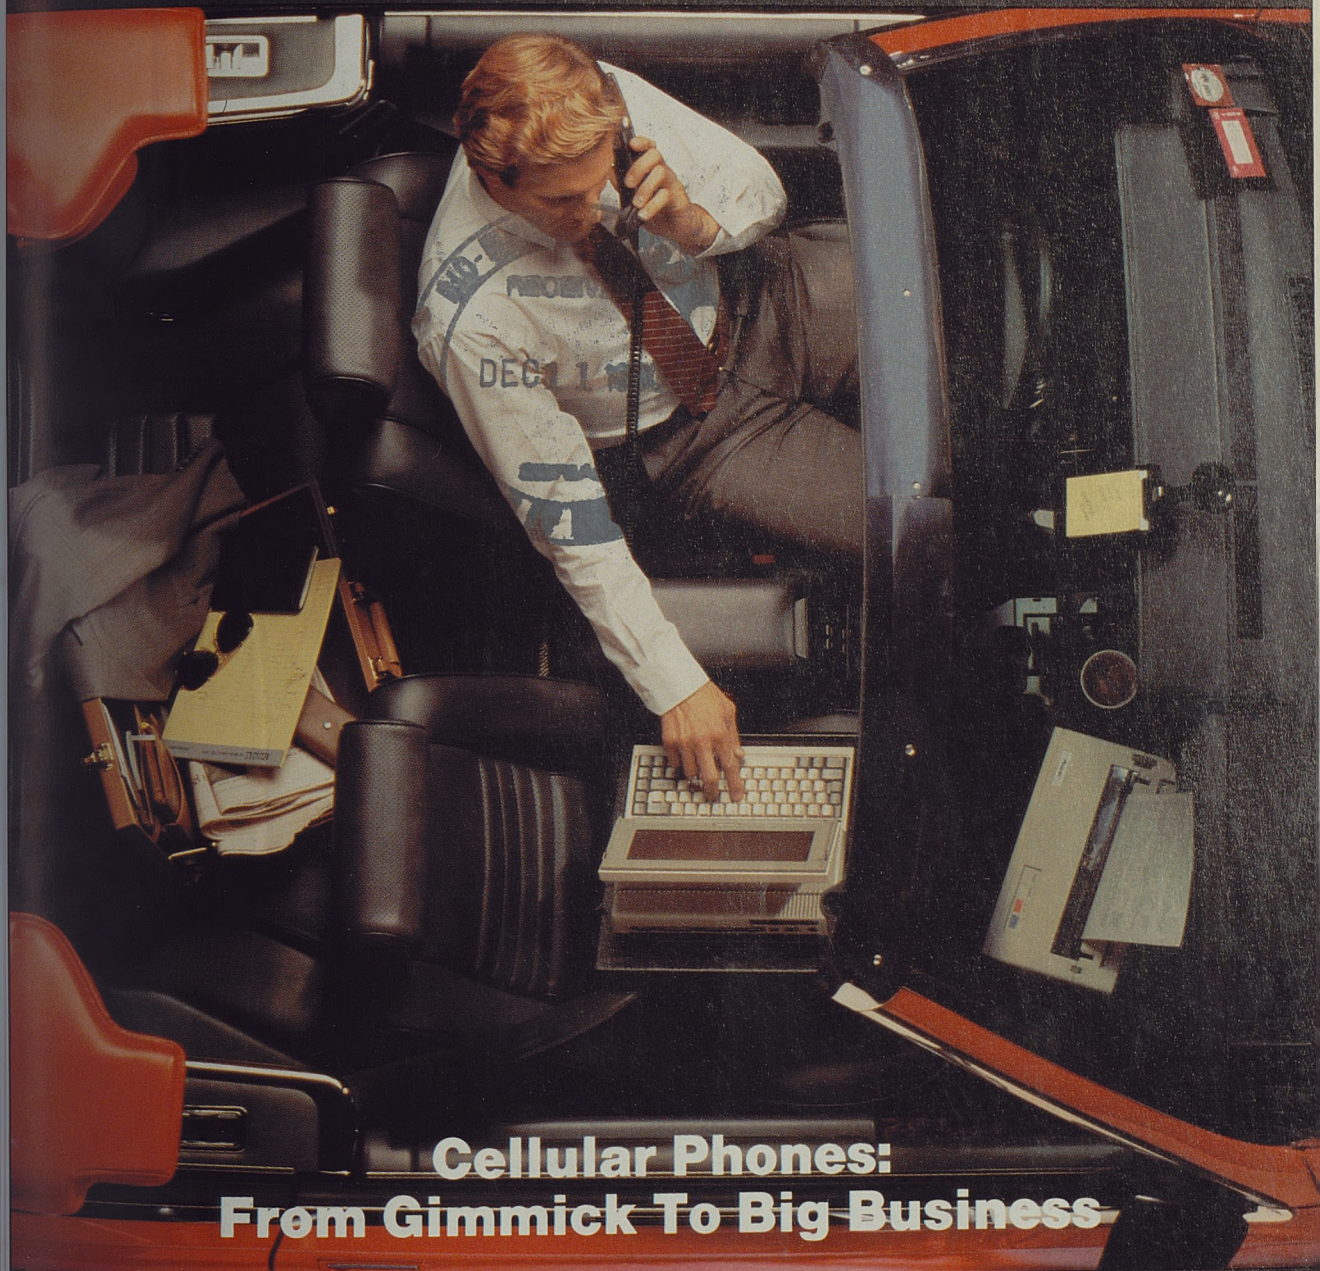

5887 Glenridge Drive  
Atlanta, GA 30328
