Montevideo, June 7th, 2024

IEEE Uruguay

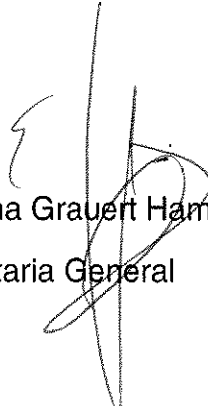

To whom it may concern;

National Administration of Telecommunications of Uruguay (ANTEL), fully supports and endorses the IEEE Milestone Proposal for the technical development, successful construction, and public operation of Telex Exchanges and Packet Switching (URUPAC) carried out by Uruguayan engineers from 1977 to 1995, which remained operational until 2012.

If the Milestone Proposal is approved by IEEE, we authorize the placement of a brass plaque (provided by IEEE) in the entrance hall of our main building; details to be coordinated prior to the installation.

We appreciate your consideration of this proposal and look forward to a positive response.

Sincerely,

  
Abg. Esc. Elena Grauert Hamann  
Secretaria General

  
Cra. Lic. Annabela Suburú  
Presidenta
